**Purpose of Contact** Permission to backfill excavations at the 865 Slab Removal Project

### **Discussion**

Based upon the analytical results received, it is understood that the 865 Slab Removal Project is approved to backfill the High Bay excavations of all the Pits, the utilities, the dock on the east side of the slab, the footer foundations and the removal of the OPWL. The Project understands that the backfill is being done "at-risk". That is, the Project will still be required to remediate soils if the outstanding analytical results show contamination above action levels.
